

# CONNECTING TASMANIA'S MINES TO THE WORLD, SUSTAINABLY.

TasRail is a long-standing partner to Tasmania's valuable mining industry. From pit-to-port, we deliver smarter freight solutions for some of the State's biggest mining operations.

## Why choose rail?

### Seamless Supply Chain Integration

We don't just move freight; we integrate into your operation. Our West Coast rail services connect directly with on-port storage and shiploading of mining concentrates, making the process smooth from mine site to ship. Our new multi-user Shiploader provides industry with significant reliability, environmental and safety benefits.

### Shift the lever on Carbon Reduction

Rail freight is up to four times less carbon intensive than road transport. Shifting to rail will be a step change in your company's efforts to lower carbon emissions without compromising on efficiency.

### Safety and reliability you can count on

With year-on-year freight availability over 98 per cent, your product gets picked up and delivered when you need it - safely and reliably

# ROAD VS RAIL CARBON EMISSIONS

**80**

CO<sub>2</sub>/tonne-km

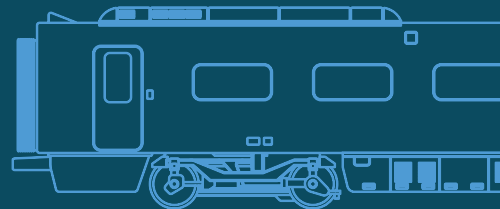

Transportation trucks emissions are 4 times more than train on a tonne for tonne basis.

## Ever thought about how much freight rail is doing for Tassie?

It's not just moving goods, supporting jobs, and providing supply chain solutions for our vital heavy industries - it's keeping excess trucks off our roads, making them safer for everyone, and cutting down on carbon emissions big time.

**20**

CO<sub>2</sub>/tonne-km

**75% less**  
than transportation trucks.
